

# Setup Acronis Integration

*This guide walks you through how to create API Credentials in Acronis and create a connection with Assurix.*

**PREREQUISITES** Admin access to Acronis environment

## 01 CREATE API CREDENTIALS

---

- 1 In Acronis, click into the Settings dropdown and click into API Clients.
- 2 Once here, click 'Create API Client'.
- 3 Give it a suitable name (Assurix Integration).
- 4 The system will then generate an API Client ID, Client Secret and a data centre URL. Please copy and store all these values somewhere secure.

## 02 CONNECT THE INTEGRATION IN ASSURIX

---

- 1 In Assurix, navigate to **Integrations** and click on **Connect** next to **Acronis Cyber Protect Cloud**.
- 2 Check your data centre URL and choose the corresponding Datacentre Region.
- 3 Then, enter the API Client ID and Client Secret that you just stored.
- 4 **Test Connection.**
