

COMPUCYCLE

Premier IT Asset Disposal.
Sustainability & Security, Guaranteed.

When it comes to e-waste, no one does it like CompuCycle

As the first women-owned R2 & e-Steward certified company in Houston, we've been reshaping the standards for IT asset recycling since 1996. Our in-house, state-of-the-art processing ensures total data security, regulatory compliance, and environmental impact your company can stand behind.

What Sets Us Apart

Cutting Edge Electronics Processing

As part of the 1% of certified processors handling all materials in-house, CompuCycle guarantees responsible, regulation-exceeding outcomes—no downstream dumping.

Value Back to Customer

Our IT Remarketing process restores technology to peak condition through secure data sanitization and professional refurbishment—resulting in maximum value paid for assets.

Chain of Custody Logistics = No Loose Ends

From branded equipment pick-up to final processing, your assets stay in a locked chain of custody—no gaps, no guesswork.

Unmatched E-Plastics Processing

We're one of the only U.S. recyclers with the tech to sort, clean, and process e-waste plastics for domestic reuse—keeping materials out of landfills and in the economy.

ESG Documentation You Can Act On

Get a full suite of downloadable reports, including audit trails, drive destruction logs, asset inventories, and environmental impact scorecards.

Real-Time Transparency

Track every asset with 24/7 access to reports and certificates through our online customer portal—transparency you can trust.
