

CONTINUOUS EXPOSURE VALIDATION PLATFORM

Continuous Exposure Validation

Autonomous testing. Continuous compliance. Continuous protection.

PentestOps continuously discovers your attack surface, validates which exposures are truly exploitable, and prioritises what matters most, so your team can remediate real risk faster and demonstrate compliance without waiting on a scheduled test.

Reduce Exposure

Shrink attack surface continuously

Validate Real Risk

Confirm what's truly exploitable

Accelerate Fixes

AI-guided remediation guidance

Improve Compliance

Continuous framework mapping

SCAN

Continuous Discovery

Attack surface, cloud, and internal exposure discovered and rescanned continuously, not once a quarter.

EXPLOIT

AI-Assisted Validation

Findings are safely validated to confirm real-world exploitability, with self-hosted AI so your scan data stays yours.

REPORT

Continuous Compliance

Findings map to your frameworks automatically, with live re-verification as fixes land and drift appears.

WHY PENTESTOPS

Continuous Compliance Mapping

Findings map to your frameworks automatically, always current.

Real-Time Findings

Live dashboard: no waiting on a report.

No Consultant Scheduling

Always-on testing: no calendar to work around.

Ready to see it on your own environment?
