

Find Patient Zero Before They Do!

Real-Time External Threat Surveillance to Stop Breaches Before They Begin

Cyfax delivers always-on visibility into exposed credentials, attack infrastructure, impersonation domains, and exploitable services — weeks before attackers strike. Built for security leaders, Cyfax uncovers hidden exposure and transforms it into actionable, risk-reducing alerts.

Key Features:

Early Breach Detection

Identifies leaked credentials, domain impersonation, and attack infrastructure across global sources.

Real-time Risk Alerts

Certified analysts review and confirm critical findings — no false positives.

Global Perimeter Surveillance

Continuously monitors forums, ransomware groups, stealer logs, CVE exploits, and asset exposure.

Value Proposition

Cyfax delivers breach prevention intelligence by scanning 20,000+ sources daily — from ransomware blogs to stealer logs and DNS records.

With Cyfax, you gain:

- **Early Warning:** Credentials and infrastructure flagged weeks before encryption begins.
- **Strategic Insights:** Alerts include remediation guidance mapped to MITRE, OWASP, and NIST.
- **Continuous Monitoring:** 24/7 surveillance to detect and neutralize risk across your external footprint.

What Sets Cyfax Apart?

Third-Party Risk Management:

Upload a vendor list, receive dynamic risk scores and exposure alerts in under an hour.

VIP Exposure Monitoring:

Prioritized surveillance of executive accounts and high-risk personnel across threat surfaces..

Automated Domain Takedown:

Built-in detection and escalation workflows to eliminate impersonation domains fast.

IT / IOT / OT Vulnerability Detection:

Cyfax spans traditional and industrial networks to surface risks before attackers do.

System Alerts and Subscriber Benefits

How Cyfax Keeps You Informed Real-time Alerts for Global Subscribers

Proactive Threat Intelligence: Cyfax doesn't just notify you after a breach — it helps you prevent one. Our system identifies compromised credentials, impersonated assets, and signs of ransomware staging before they escalate.

01

Continuous Monitoring: Our platform constantly scans various sources, including dark web forums, encrypted chat rooms, and public websites, for any new threats or vulnerabilities.

02

Immediate Alerts: Subscribers receive immediate alerts whenever a new IOC or area of concern is detected. This enables you to take prompt action and mitigate risks before they escalate.

03

Actionable Insights: Each alert is accompanied by detailed, actionable insights from our certified Threat Intelligence analysts. This includes recommendations for remediation and strategies to enhance your security defenses.

Stay Ahead with Cyfax

Global Coverage:

Cyfax scans across languages, forums, and ransomware blogs worldwide.

Detailed and Compliant Reports:

On-demand threat briefings tailored to your assets. Cyfax reports align to frameworks like MITRE, OWASP, and NIST — perfect for security audits, board reviews, and cyber insurance assessments.

Expert Analysis:

Access to expert analysis and support to help you understand and respond to threats effectively.

Subscribe to Cyfax

Cyfax gives you the intelligence to prevent breaches before they escalate.

Get alerted to credential leaks, ransomware staging, and exploitable services — early enough to act.

Subscribe today for continuous protection across your external attack surface.
